MASIERO®

L'atmosfera sontuosa dei palazzi veneziani dell'epoca dei Dogi, rivive in creazioni uniche ed esclusive. La luce ed il colore sembrano scendere dagli alti soffitti a cassettoni e posarsi sugli stucchi e gli affreschi, fluendo dolcemente dai paralumi delicati in organza di seta.

Lampi di colore, d'oro e d'avorio, d'ocra e di rosso vivo, donano vita a questi sfarzosi lampadari che perdono la patina degli anni per tornare ad essere per sempre contemporanei.

The luxurious atmosphere of Venetian palazzos under the Doges is revived in these exclusive and unique creations.

Light and colour blend together and flow down gently from the delicate silk organza lampshades in the tall vaulted ceilings and rest on the stuccos and frescoes. Flashes of colour, gold, ivory, ochre and bright red breathe life into these magnificent evergreen lamps that are never dated.

L'atmosphère somptueuse des palais vénitiens de l'époque des Doges revit dans des créations uniques et exclusives.

La lumière et la couleur donnent l'impression de descendre des hauts plafonds à caissons et de se poser sur les stucs et les fresques, coulant doucement des abat-jours délicats en organdi de soie. Des éclairs de couleur, d'or et d'ivoire, d'ocre et de rouge vif, donnent naissance à ces lustres fastueux qui perdent la patine du temps pour redevenir contemporains pour toujours.

Die prächtige Atmosphäre der venezianischen Paläste aus der Zeit der Dogen lebt in einzigartigen, exklusiven Kreationen wieder auf.

Licht und Farben kommen gleichsam von den hohen Kassettendecken herunter, fließen sanft von feinen Lampenschirmen aus Seidenorganza und lassen sich auf den Stuckaturen und Fresken nieder.

Blitze aus Farbe, Gold und Elfenbein, Ocker und leuchtend Rot erwecken diese prunkvollen Lampen zum Leben, die die Patina der Jahre ablegen und nun für immer unserer Zeit angehören.

Атмосфера венецианских дворцов эпохи Дожей оживает в уникальных и эксклюзивных произведениях.

Свет и цвет как будто сходят с высоких кессоновых потолков и ложатся на лепнину и фрески, мягко стекая с тонких абажуров из шелковой органзы. Цветные лампы, золотые и слоновой кости, цвета охры и ярко-розовые, оживляют эти роскошные люстры, которые теряют налет времени, чтобы вернуться и стать вечно современными.

IMPERO

MASIERO®

Dai ricchi saloni Asburgici, illuminati da imponenti candelieri, giungono le scene di balli fastosi. Dai soffitti scendono, sontuosi e delicati, mille cristalli di luce. Mille gocce preziose trasparenti, vive e forti nei colori dell'iride.

Le strutture in oro e argento cullano leggere nuvole di brillanti che sembrano sospese nel tempo per creare giochi di luce sempre unici.

Lo stile neorinascimentale abbraccia il cristallo in una danza senza tempo, per creare emozioni ancora una volta irripetibili.

Scenes of sumptuous balls reach us from the rich Hapsburg halls, lit by the impressive chandeliers, spreading a thousand gorgeous and delicate crystals of light. A thousand precious transparent drops, which reflect all the colours of the rainbow. The gold and silver fitting cradles bright clouds that seem to be suspended in time, creating unique plays of light.

The neo-renaissance style embraces crystal in a timeless ballet which creates unrepeatable emotions.

Les scènes de bals fastueux proviennent des riches salons des Habsbourg, illuminés par d'imposants chandeliers. Des plafonds descendent, somptueux et délicats, mille cristaux de lumière. Mille gouttes précieuses transparentes, vives et fortes dans les couleurs de l'iris. Les structures en or et argent bercent de légers nuages de brillants qui ont l'air suspendus dans le temps pour créer des jeux de lumière uniques.

Le style néo-renaissance embrasse le cristal dans une danse intemporelle, pour créer des émotions encore une fois uniques.

Aus den reichen, von imposanten Kerzenhaltern beleuchteten Salons der Habsburger erreichen uns Szenen prunkvoller Bälle. Von den Decken hängen tausend prächtige, zarte Kristalle aus Licht herab. Tausend kostbare, transparente Tropfen, lebhaft und intensiv, in den Farben des Regenbogens. Strukturen aus Gold und Silber wiegen leichte Wolken aus Brillanten, die in der Zeit zu schweben scheinen und immer neue, einzigartige Lichtspiele kreieren. Der Stil der Neorenaissance fasst das Kristallglas in einem zeitlosen Tanz ein, und weckt neue, unnachahmliche Emotionen.

Из богатых салонов Гасбургов, освещенных огромными подсвечниками, они присоединяются к сценам пышных балов. Спускаются сползком, роскошные и утонченные, с тысячами кристаллов света.

Тысячи драгоценных прозрачных капель, живых и сильных в цветах радуги.

Каркасы из золота и серебра убаюкивают легкие облака бриллиантов, которые, кажется, подвешены во времени, чтобы создавать всегда уникальную игру света.

Стиль Нео-Возрождения обнимает хрусталь в танце, не знающем времени, чтобы вновь и вновь создавать эмоции, каждый раз неповторимые.

La luce è la regina della stanza e inzuppa l'ambiente di lampi vivi e colorati, nella naturale eleganza di un'oggetto dalle caratteristiche inconfondibilmente artigianali, che porta con sé poesia e magia. Le geometrie e le linee si incrociano e si snodano sinuose tra vetro e cristallo, tra oro e cromo, per dare vita a nuovi stili e nuovi accostamenti.

Light reigns supreme and drenches the room with bright, coloured flashes that steep with poetry and magic the natural gifted style of its unmistakable handcraft features. The geometries and lines interweave through glass and crystal, gold and chrome, to generate new styles and accompaniments.

La lumière est la reine de la pièce et trempe le cadre d'éclairs vifs et colorés, dans l'élégance naturelle d'un objet ayant des caractéristiques artisanales uniques, qui amène avec lui la poésie et la magie. Les géométries et les lignes se croisent et se déroulent sinueuses entre le verre et le cristal, entre l'or et le chrome, pour donner naissance à de nouveaux styles et de nouveaux rapprochements.

Das Licht ist die Königin des Raums und taucht das Ambiente in lebhaft, farbenfrohe Blitze durch die natürliche Eleganz eines Objekts mit unvergleichlichen, handwerklichen Merkmalen, das Poesie und Magie mit sich bringt. Geometrien und Linien überschneiden sich und winden sich in Kurven zwischen Glas und Kristall, Gold und Chrom, um neue Stile und Kombinationen ins Leben zu rufen.

Свет – это король комнаты, он пропитывает помещение живыми и цветными лампами, в естественной элегантности предмета, имеющего свойства изделия ручной работы мастера, которые нельзя ни с чем перепутать, несущего в себе поэзию и магию. Геометрия и линии пересекаются и извилисто переплетаются между стеклом и хрусталем, между золотом и хромом, чтобы дать жизнь новым стилям и новым сближениям.

MASIERO®

Lampade e punti luce sono vere e proprie sculture, realizzate in metalli nobili e preziosi. Le mani sapienti dell'artigiano modellano la materia, per creare decori classici oppure ricchi ornamenti barocchi. Ma modellano anche linee essenziali e pulite, per ottenere oggetti senza tempo, eleganti ed eterni.

Sculptured lamps and spotlights in precious metals. The craftsman's expert hands knowingly shape matter to create classic or richly ornamental baroque decorations, or essential and clean lines creating timeless, elegant and eternal designs.

Les scènes de bals fastueux proviennent des riches salons des Habsbourg, illuminés par d'imposants chandeliers. Des plafonds descendant, somptueux et délicats, mille cristaux de lumière. Mille gouttes précieuses transparentes, vives et fortes dans les couleurs de l'iris. Les structures en or et argent bercent de légers nuages de brillants qui ont l'air suspendus dans le temps pour créer des jeux de lumière uniques. Le style néo-renaissance embrasse le cristal dans une danse intemporelle, pour créer des émotions encore une fois uniques.

Lampen und Lichtpunkte sind echte Skulpturen, die aus kostbaren Edelmetallen gefertigt werden. Die geschickten Hände der Handwerker modellieren die Materie und schaffen so klassische Dekors oder reiche barocke Verzierungen. Doch sie modellieren auch schlichte, reine Linien, um zeitlose, elegante Gegenstände für die Ewigkeit zu schaffen.

Люстры и точечные светильники – это самые настоящие скульптуры, сделанные из благородных и драгоценных металлов. Умелые руки мастера моделируют материю, чтобы создать классические декоры или богатые барокальные орнаменты. Но моделируют также основные и гладкие линии, чтобы получить предметы, не знающие времени, элегантные и вечные.

GRANIGLIA

MASIERO®

L'arte ancestrale dei soffiatori veneziani ritrova la sua espressione più rara e caratteristica.

La sabbiatura e gli altri trattamenti specifici rendono il vetro particolarmente opaco, conferendogli nel contempo una fortissima componente materica. La graniglia è il vetro importante, vivo e caldo, che regala effetti luminosi sempre nuovi, con colori dolci e linee morbide.

The rarest and most typical expression of the ancestral art of Venetian glassblowers is revived. Sanding and other special treatments make the glass extremely opaque, giving it a strongly material air. Gritted glass is alive and warm, creating constantly new lighting effects with gentle colours and lines.

L'art ancestral des souffleurs vénitiens retrouve son expression la plus rare et caractéristique.

Le sablage et les autres traitements spécifiques rendent le verre particulièrement opaque, lui donnant en même temps une très forte composante de matière. Le grès est le verre important, vif et chaud, qui offre des effets lumineux toujours nouveaux, avec des couleurs douces et des lignes souples.

Die antike Kunst der venezianischen Glasbläser findet hier ihre erlesene, charakteristische Ausdrucksform. Durch das Sandstrahlen und weitere, besondere Behandlungen wird das Glas besonders matt, und erhält dabei gleichzeitig eine starke Materiekomponente. Graniglia-Glas ist bedeutsames, lebendiges und warmes Glas, das immer neue Lichteffekte schenkt, mit zarten Farben und weichen Linien.

Искусство венецианских стеклодувов былых времен находит свое самое редкое и особое выражение.

Пескоструйная и другие специальные обработки делают стекло специфически матовым, придавая ему одновременно сильную составляющую нетрадиционного материала. Гранулированная пластмасса – это внушительное стекло, живое и теплое, которое дарит каждый раз новые световые эффекты с теплыми цветами и мягкими линиями.
